## AMENDMENTS TO THE CLAIMS

1. (Currently Amended) A method for handling timer expiration exceptions, transaction exceptions, and network exceptions in a business-to-business transaction, comprising the steps of:

monitoring an internet gateway through which the business-to-business transaction passes for <u>exceptions</u>, <u>wherein the exceptions comprise</u> timer expiration exceptions, transaction exceptions, and network exceptions, wherein if an exception is detected:

automatically locating an authorized representative, wherein the authorized representative is a designated person who has authority to consummate the business-to-business transaction;

automatically notifying the authorized representative of the exception; automatically establishing a <u>web</u> collaboration session between representatives of the business-to-business transaction, <u>wherein the web collaboration session comprises page sharing</u>, follow-me, form share, text chat, <u>application demonstration</u>, <u>application sharing and white boarding functions</u>.

- 2. (original) The method of Claim 1 further comprising the step of using an intelligent contact manager to automatically locate the authorized representative.
- 3. (original) The method of Claim 2, wherein the intelligent contact manager comprises the functions of pre-routing, post-routing, customer-profile, computer telephony integration, enterprise-wide reporting, web interaction, remote agent support, voice recognition integration, and workforce management integration.

Serial No. 09/727,841 Examiner: Bayard, Dienane M.

- 4. (canceled)
- 5. (canceled)
- 6. (original) The method of Claim 1 further comprising the step of using a unified communication system to automatically notify the authorized representative of the exception.
- 7. (original) The method of Claim 6, wherein the unified communication system comprises voice messaging, email messaging, and fax messaging.
- 8. (original) The method of Claim 6, wherein the unified communication system comprises a telephone call, a sequence of contacts, an SMS message to a called party's pager or cell phone, or incoming calls being routed through a series of telephone numbers based on peer, person, or LDAP list.
  - 9. (canceled)
- 10. (original) The method of Claim 1 further comprising the step of handling exceptions corresponding to demand planning.
- 11. (original) The method of Claim 10, wherein business-to-business (B2B) processing utilizes the engine to perform steps of requisitioning,

Serial No. 09/727,841 Examiner: Bayard. Dienane M. purchasing, approval, ordering, receiving, distribution, payment, and measurement.

- 12. (original) The method of Claim 1 further comprising the step of handling exceptions corresponding to procurement processes.
- 13. (original) The method of Claim 1, wherein the business-to-business transaction is handled through e-mail and LDAP containing XML data.
- 14. (original) The method of Claim 1, wherein the exception is handled by e-mail.
- 15. (currently amended) An apparatus for handling timer expiration exceptions, transaction exceptions, and network exceptions in a business-to-business transaction, comprising:

an exception detector which monitors an internet gateway through which the business-to-business transaction passes for <u>exceptions</u>, <u>wherein the exceptions comprise</u> timer expiration exceptions, transaction exceptions, and network exceptions;

an intelligent contact manager coupled to the exception detector to automatically locate an authorized representative, wherein the authorized representative is a designated person who has authority to consummate the business-to-business transaction;

a unified communication system coupled to the intelligent contact manager which automatically notifies the authorized representative of the exception;

Serial No. 09/727,841 Examiner: Bavard. Dienane M. Art Unit 2141 Atty Docket No.: CSCO-2894 a collaboration system coupled to the unified communication system which automatically establishes a <u>web</u> collaboration session between representatives of the business-to-business transaction, wherein the web collaboration comprises page sharing, follow-me, form share, text chat, application demonstration, application sharing, and white boarding functions.

- 16. (original) The apparatus of Claim 15, wherein the intelligent contact manager comprises the functions of pre-routing, post-routing, customer-profile, computer telephony integration, enterprise-wide reporting, web interaction, remote agent support, voice recognition integration, and workforce management integration.
  - 17. (cancel)
  - 18. (cancel)
- 19. (original) The apparatus of Claim 15, wherein the unified communication system comprises voice messaging, email messaging, and fax messaging.
- 20. (original) The apparatus of Claim 19, wherein the unified communication system comprises a telephone call, a sequence of contacts, an SMS message to a called party's pager or cell phone, or incoming calls being routed through a series of telephone numbers based on availability and schedules.

## 21. (canceled)

Serial No. 09/727,841 Examiner: Bayard. Dienane M.

- 22. (previously presented) The apparatus of Claim 15 wherein the apparatus handles exceptions corresponding to demand planning.
- 23. (original) The apparatus of Claim 22, wherein the business-to-business procurement includes business-to-business requisitioning, purchasing, approval, ordering, forecasting, receiving, distribution, payment, and measurement.
- 24. (previously presented) The apparatus of Claim 23 wherein the apparatus handles exceptions corresponding to procurement processes.
- 25. (currently amended) A computer-readable medium having stored thereon instructions for handling timer expiration exceptions, transaction exceptions, and network exceptions in a business-to-business transaction, comprising the steps of:

monitoring an internet gateway through which the business-to-business transaction passes for <u>exceptions</u>, <u>wherein the exceptions comprise</u> timer expiration exceptions, transaction exceptions, and network exceptions, wherein if an exception is detected:

authorized representative, wherein the authorized representative is a designated person who has authority to consummate the business-to-business transaction;

automatically notifying the authorized representative of the exception; automatically establishing a <u>web</u> collaboration session between representatives of the business-to-business transaction, wherein the web

Serial No. 09/727,841 Art Unit 2141
Examiner: Bayard. Dienane M. - 6 - Attv Docket No.: CSCO-2894

collaboration comprises page sharing, follow-me, form share, text chat, application demonstration, application sharing, and white boarding functions.

26. (original) The computer-readable medium of Claim 25 further comprising instructions for using an intelligent contact manager to automatically locate a sequence of authorized representatives.

- 27. (original) The computer-readable medium of Claim 25, wherein the business-to-business transaction is handled through e-mail and LDAP containing XML data.
- 28. (original) The computer-readable medium of Claim 25, wherein the exception is handled by e-mail.
- 29. (currently amended) A computer system for handling exceptions, wherein the exceptions comprise timer expiration exceptions, transaction exceptions, and network exceptions in a business-to-business transaction, comprising:

means for monitoring an internet gateway through which the businessto-business transaction passes for timer expiration exceptions, transaction exceptions, and network exceptions, wherein if an exception is detected:

means for automatically locating an authorized representative, wherein the authorized representative is a designated person who has authority to consummate the business-to-business transaction;

means for automatically notifying the authorized representative of the exception;

Serial No. 09/727,841 Examiner: Bayard, Dienane M. Art Unit 2141 Atty Docket No.: CSCO-2894

-7-

means for automatically establishing a <u>web</u> collaboration session between representatives of the business-to-business transaction, <u>wherein the web</u> collaboration comprises page sharing, follow-me, form share, text chat, application demonstration, application sharing, and white boarding functions.

- 30. (original) The computer system of Claim 29 further comprising means for using an intelligent contact manager to automatically locate a sequence of authorized representatives.
- 31. (original) The computer system of Claim 29 further comprising means for handling the business-to-business transaction through e-mail and LDAP containing XML data.
- 32. (original) The computer system of Claim 29 further comprising means for handling the exception by e-mail.
- 33. (previously presented) The method of Claim 1, further comprising issuing a timer expiration exception when a sending application does not receive a confirmation within a predetermined time period.
- 34. (previously presented) The method of Claim 1, further comprising generating a transaction exception when content, format, security, availability, or other characteristics of said transaction are out of pre-determined boundaries.

Serial No. 09/727,841 Examiner: Bayard. Dienane M. 35. (previously presented) The method of Claim 1, further comprising generating a network exception when a messaging infrastructure cannot support a message transaction.
